Coda

Coda

In the world of
serious hi-fi, KEF

has been a name to be reckoned with for three decades. As any audiophile will tell you, our Reference Series loudspeakers are acknowledged to be amongst the finest in the world.

But shouldn't serious audio quality be available to a wider audience?

That's our philosophy - and that's why we've created the new Coda range. With high-end technology and quality engineering in a compact format, Coda outperforms every other speaker in its class.

The proof is in the listening.

The illusion of presence is uncanny. Vocals and lead instruments suddenly acquire a clarity and definition that you've never heard before. The amazingly weighty bass response is tightly controlled right across the frequency range - and large, wide dispersion tweeters give superb stereo imaging.

There are three models in the range - and as you can see from the distinctive cabinets, they certainly look the part. If you're upgrading your mini or midi system to real hi-fi, you'll find them a revelation - and as secondary speakers in a top level audio or home cinema set-up, they'll deliver purity, depth and seamless mid-range response.

The fact is, KEF Codos are in a class of their own. As one highly respected magazine put it, "*Stunning speakers on any terms - for the price, they're little short of a miracle.*"

If you think that sounds good, wait 'til you hear your favourite tracks through a pair of Codos.

Concept Coda.

Best Entry Level Speaker

Coda 7

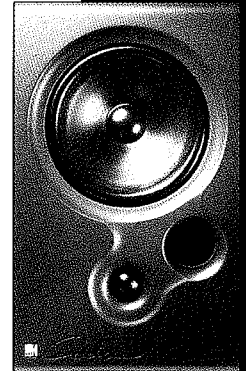

As the world's press has recognised, Coda 7 redefines the standard for entry-level hi-fi speakers. A super flat response 25mm (1") soft dome tweeter (larger than any other in its class) is combined with 130mm (5¼") coated paper bass-mid unit and a cleverly designed crossover to deliver stunning mid-band performance. A revelation.

Coda 7

Coda 8

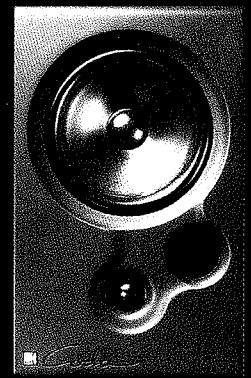

By partnering the same smooth yet highly detailed 25mm (1") soft dome tweeter with a meatier 165 mm (6½") coated paper bass-mid driver, Coda 8 combines improved bass output and extension with a slightly warmer overall sound balance. For a speaker with this quality of bass performance, you will be astonished by its remarkable 91dB sensitivity.

Coda 8

Coda 9

The premier speaker of a mould-breaking range, Coda 9 features an internal sub-bass driver in KEF's renowned 'coupled cavity' configuration, with a computer-designed full 3-way crossover (as in the legendary Reference Series). Tweeter, mid-bass and sub-bass are thus seamlessly integrated - and the sound quality is rich, balanced and minutely detailed. A masterpiece by any standards; at the price, nothing else even comes close.

Coda 9

SPECIFICATIONS	CODA 7	CODA 8	CODA 9
Description	Two way bookshelf/ stand mount	Two way bookshelf/ stand mount	Three way floor standing
Drive Units	HF: 25 mm (1") soft dome tweeter LF: 130 mm (5 1/4") coated paper cone	HF: 25 mm (1") soft dome tweeter LF: 165 mm (6 1/2") coated paper cone	HF: 25 mm (1") soft dome tweeter LF: 165 mm (6 1/2") coated paper cone Sub LF: 165 mm (6 1/2") coated paper cone
Effective Frequency Range +/- 3 dB	48 Hz - 20 kHz	45 Hz - 20 kHz	40 Hz - 20 kHz
